

Oregon State University
and
the Oregon Clean Power Cooperative
invite you to attend a
Groundbreaking Ceremony

Solar Harvest Agrivoltaics Research Center
North Willamette Research and Extension Center
15210 NE Miley Rd, Aurora, OR 97002
Tuesday, October 11th, 2022
4:00 - 5:00 p.m.

RSVP to info@oregoncleanpower.coop by October 6th, 2022

**Solar Harvest
Agrivoltaics Research Center**

Agrivoltaics

A combination of agriculture and photovoltaics, ***agrivoltaics*** combines solar energy generation and agricultural production on the same land.

Sharing the Sun

Oregon's farmland is precious. In the face of increased drought and rising energy prices, OSU is researching how solar energy production can support - not replace - Oregon's family farms.

Community Solar

Energy generated by the solar farm will be sold to community solar subscribers, through the member-owned Oregon Clean Power Cooperative.
