

MY WORK IS A STORY OF CONNECTION.

What story will you tell?

Job Title: Internship, Cell Biology/Bioengineering

Reports to: Sr Manager, R&D

Location: Eugene, OR

Position Summary:

This internship is an opportunity for a self-motivated and independent researcher to gain research and development experience in a fast-moving, team oriented industrial setting. The successful candidate will apply biology and engineering skills to develop new products for the life sciences and support troubleshooting in existing product lines.

Responsibilities

- Experimental design and execution, troubleshooting, data analysis and present results
- Maintain a detailed and accurate laboratory notebook
- Work on a cross-functional team
- Perform tasks independently with guidance

Desired Skills

- Demonstrated excellent experimental design, execution and data analysis
- Excellent written and verbal presentation skills
- Demonstrated ability to work alongside scientists from different backgrounds in a team environment
- Knowledge and experience working with laboratory instrumentation and software
- Ability to work independently and as a member of a cross-functional team
- Willingness to learn and be mentored

Requirements

To be eligible for an internship, candidates must:

- Have or working on a B.S. degree in biology, bioengineering, engineering or other relevant field
- Have some experience in a research laboratory setting
- Have experience with common biology lab techniques such as microscopy
