- 9-week research experience
- An individual-focused nanotechnology project with training & support
- Housing on campus
- Meal Plan provided
- Paid travel or travel allowance
- Open to undergraduates

Applications accepted
through 2/14/24

SHyNE Resource has developed a unique REU program providing facilities-focused research projects for four undergraduate students (50% from underrepresented minority groups).

This combination of a traditional REU research experience with the hands-on instrumentation focus provides an opportunity for students to learn new skills and enrich their experience.
