

Undergraduate Research Internships in Toxicology

What: A paid 8-week summer-term research experience for OSU students interested in Toxicology. Interns receive a \$4800 scholarship stipend and participate in hands-on laboratory and/or field research, round table discussions, seminars, lab group meetings, career development and social activities.

When: June 30 – August 22, 2025

Where: OSU Department of Environmental & Molecular Toxicology

Who: Current OSU undergraduate students without significant prior research experience are eligible. Students from groups who are underrepresented in the sciences and international students (especially those of Chinese descent) are encouraged to apply.

Applications for the Introduction to Toxicology Internships are now being accepted until March 15th. Award announcements will begin April 15.
