

# Marine Policy in the United States

PPOL 448/548 Spring 2025, 4 Credits

Dr. Holly V. Campbell

ECAMPUS

## CRNs:

PPOL448 54009

PPOL548 54010

Student-driven  
course features:

- Personalized instruction
- Reading and Discussion
- Research, and Short, Analytical Writing

-No required text book

-Research project in lieu of a final exam

-No prerequisites

Everyone is welcome!

**The United States manages around 4.5 million miles of ocean space on behalf of the American people.**

How do we advance and adapt marine policy tools to sustainably balance resource use with conservation for the future?

How are decisions made regarding marine resources?

This course introduces students to the history, rationale, achievements, and gaps in American ocean policy from the nation's founding to the present. Students will acquire and practice tools of policy analysis and problem solving, and will synthesize and apply their knowledge creatively to proposals for integrated policy solutions to specific contemporary marine issues.
