

# INTRODUCTION TO THE STUDIES OF SCIENCE, TECHNOLOGY AND SOCIETY

**ANTH 580 • SPRING 2021 • TAUGHT BY DR. SHAOZENG ZHANG**  
Questions? Email: [shaozheng.shang@oregonstate.edu](mailto:shaozheng.shang@oregonstate.edu)

This seminar course offers an introduction to the relatively young field of Science and Technology Studies. STS is the interdisciplinary study of how science and technology shape society and the environment, and conversely how society and the environment shape science and technology, from various perspectives in the humanities and social sciences: anthropology, sociology, history, philosophy/ethics, and political science.
