

THE NUCLEAR POWER PEOPLE WANT

LEARN ABOUT KALEIDOS

October 22nd | 5pm-6pm | Johnson Hall 221

ABOUT US

Radiant is a clean energy startup building advanced nuclear microreactors. A climate-friendly alternative to diesel generators, Radiant's Kaleidos 1MW microreactor will be Earth's first mass-produced portable nuclear reactor that works anywhere. Join us and learn more about our open full-time and internship opportunities. Pizza provided!

MAJORS

- Nuclear Engineering
- Mechanical Engineering
- Computer Science
- Electrical Engineering
- Open to other engineering majors!
