

Robotics Town Hall

Ali Jones & Miranda Cravetz
Graduate Students & Union Representatives
Oregon State University

Calling all roboticists! Let's talk about our community! This special seminar is a town hall meeting for the robotics department - a time and place to discuss working conditions, workspace priorities, and our collective vision for the program. The presenters will also share some info about our labor union, the Coalition of Graduate Employees (CGE)! We will go over the history and structure of CGE, the current demands our union's bargaining team is fighting to secure for current and future grads, and how we can use our collective power to strengthen our community. There will be space for discussion, questions, and input on CGE matters.

Ali Jones (MS Robotics, OSU): Ali is a second year MS student working in the Intelligent Machines and Materials Laboratory on soft, underwater, bioinspired, jet propulsive robots. Their research uses artificial muscles and compliant mechanisms inspired by the efficient locomotion of the salp.

Miranda Cravetz (PhD Robotics, OSU): Miranda is a fourth year PhD student in the Intelligent Machines and Materials Laboratory. Her research focuses on leveraging mechanical compliance for interactive and contact-rich manipulation tasks in everyday environments.

FRIDAY
Mar 15
10-11AM

Rogers Hall 230
